in FdelMazo • 🔗 FdelMazo

22 years old, Computer Engineering Student, developer at Raico S.A.

Work Experience

Raico S.A.

Software developer

April 2018–Now

<https://www.raiconet.com/>

Development and support of the web application and the mobile app of Raico S.A.

Development of *Exporta Simple*, a web platform integrated with the Argentine Ministry of Production

Technologies: Grails, Java, Groovy, MySQL

Universidad de Buenos Aires, Facultad de Ingeniería

Teaching assistant - Algorithm Theory I

January 2019–Now

<https://algoritmos-rw.github.io/tda/>

Covered topics: P, NP, NP-Complete, reductions, divide and conquer, programming heuristics (dynamic programming, greedy techniques), network flow, randomized algorithms, approximation algorithms, computation, regular languages, Turing machines.

Teaching assistant - Algorithms and Programming II

August 2017–Now

<https://algoritmos-rw.github.io/algo2/>

Classes, workshops, making and grading of exams.

Covered topics: C, memory management, algorithmic complexity, abstract data types, data structures (linked lists, hash tables, trees, heap queues), graph theory (minimum spanning tree, traversal).

Education

Universidad de Buenos Aires, Facultad de Ingeniería

Computer Engineering student

2016–Now

Outstanding grades:

- Algoritmos y Programación I - Distinguido (8)
- Algoritmos y Programación II - Distinguido (9)
- Organización de Datos - Sobresaliente (10)
- Teoría de Algoritmos I - Sobresaliente (10)
- Sistemas Operativos - Sobresaliente (10)

Colegio Ward

Bilingual bachelors' degree in economics and business administration

2009–2014

Grade Point Average 8.29

August 2019

Specific skills

- **Programming languages:** C, Python, Java, JavaScript.
- **Programming paradigms and algorithm design techniques:** Procedural programming, object-oriented programming, dynamic programming, divide and conquer, greedy algorithms
- **Other topics:** Data analysis, computational complexity, machine learning, MapReduce, graph theory, data compression, PageRank, hashing
- **Other languages:** SQL, TeX.
- **Frameworks and miscellaneous:** Groovy, Grails, Pandas, PySpark.
