

Federico del Mazo

Résumé

Beruti 545, Ramos Mejía (1704)

☎ +54 911 6110 1997 • ☎ 011 4656 4494 • ✉ fdelmazo@fi.uba.ar
 in FdelMazo • 🌐 FdelMazo

21 years old, Computer Engineering student.

Student eager to delve deeper into the IT industry and looking forward to improve his knowledge and skills.

Work Experience

Raico S.A.

Full Stack developer

April 2018–Now

<https://www.raiconet.com/>

Web-app and mobile application support and development.

I am in charge of supporting and constantly developing the web application and the mobile app of Raiconet, a company specialized in international transport services. The system is used daily by 50+ people in the team for the logistics and billing of packages. I am also in charge of Exporta Simple, a web platform integrated with the Argentine Ministry of Production which helps small producers with export operations.

Non-paid Work Experience

Universidad de Buenos Aires, Facultad de Ingeniería

Teaching assistant - Algorithms and Programming II

August 2017–Now

<https://algoritmos-rw.github.io/algo2/>

Classes, workshops, making and grading of exams.

Covered topics: C, memory management, algorithmic complexity, abstract data types, data structures (linked lists, hash tables, trees, heap queues), graph theory (minimum spanning tree, traversal) and programming heuristics (dynamic programming, greedy techniques).

Education

Universidad de Buenos Aires, Facultad de Ingeniería

Computer Engineering student

2015–Now

Colegio Ward

Bilingual bachelors' degree in economics and business administration

2009–2014

Grade Point Average 8.29

University of Cambridge

International General Certificate of Secondary Education (IGCSE)

2012–2013

Passed with Merit

December 2018

University of Cambridge
First Certificate in English
Grade C

2011

Specific skills

- **Programming languages:** C, Python, Java, Javascript.
- **Programming paradigms and algorithm design techniques:** Procedural programming, object-oriented programming, dynamic programming, divide and conquer, greedy algorithms
- **Other topics:** Data analysis, computational complexity, machine learning, MapReduce, graph theory, data compression, PageRank, hashing
- **Other languages:** SQL, TeX.
- **Frameworks and miscellaneous:** Groovy, Grails, Pandas, PySpark.
